

EDEN JOE

The **headrest** features a firm mesh structure for superior neck and head support.

It is height and angle adjustable.

The **lumbar support** can slide for height adjustment.

The **seat and back tilt** is synchronised, moving to an ergonomically engineered ratio, following your movement as you work.

It automatically adjusts for user weight, and can be locked in a reclined or upright position.

The soft-feel multi-adjustable **armrests** offer variability of height, depth and angle, allowing full elbow and forearm support.

The active **waterfall seat front** offers a subtle reactive tilt which mirrors human reflexes.

It promotes circulation and joint and muscle activity, allowing a uniquely pressure-free sit.

JOE'S UNIQUE RESPONSIVE MECHANISM
FEATURES DYNAMIC MULTI-MOVEMENT SUPPORT.
