

# Lume

The Lume mesh chair blends modern design with advanced ergonomic features to create a comfortable and versatile seating solution. Available in a sleek black or stylish grey finish, Lume features a breathable mesh back, a contoured seat with a sliding adjustment for optimal support, and a tilt locking mechanism to customise recline preferences. Its refined aesthetic and dynamic functionality make it a perfect addition to any contemporary workspace.

## Features

A simple lever allows for quick and effortless seat height customisation.

The self-weighted recline mechanism automatically adjusts to the user's body weight for optimal comfort, while the four-position tilt lock allows users to select their preferred recline angle.

An adjustable seat-slide further enhances support by tailoring seat depth to accommodate different leg lengths.

Breathable mesh backrest, designed for airflow and enhanced comfort, the mesh backrest helps keep you cool during long hours of use.

Adjustable lumbar support provides customisable lower back support for improved posture and comfort.

High-density molded seat foam ensures long-lasting comfort and ergonomic support.

Height adjustable armrests provide additional support and can be removed if preferred.

Quality gas lift with 100mm travel allows smooth and stable height adjustments.

Quality nylon star base, paired with 60mm unhooded castors, ensures durability and effortless mobility.

Quick dispatch option - Available in knock-down (KD) format for fast 48-hour dispatch.
