

Every workplace needs quiet space

In today's interconnected world, the places where we work, travel, or spend our time reflect this connectivity. Whether it's open-plan and collaborative office environments or bustling airport terminals and expansive public spaces, the trend is clear: fewer physical barriers separate us from our surroundings. Yet, as we embrace this culture of openness and cooperation, we also face a significant trade-off: a decline in privacy.

Office pods, also known as work pods or personal workspaces, have emerged as a popular solution for creating focused and private working environments within shared spaces. Pods can help solve the dilemma of a noisy open office by providing a quiet space free of office distractions.

Pods are essentially small rooms within other rooms and offer private places where people can make phone or video calls, or simply somewhere to work in silence. They can easily be installed and do not have the disadvantages of building additional spaces the traditional way - no building consents, disruptions, or unseen costs.

Incorporating one or multiple pods into your workspace can result in time, energy, and cost savings. They offer a straightforward means to boost efficiency and enhance team productivity.

Why consider an office pod?

Privacy and Focus: Office pods eliminate the need for employees to search for quiet rooms or leave the premises. They offer a secluded workspace for concentrated tasks, confidential discussions, or important calls, effectively shielding you from distractions and safeguarding your privacy.

Noise Reduction: Equipped with soundproofing features, office pods create a quieter environment that fosters increased concentration and heightened productivity.

Adaptability and Versatility: Whether you require a quiet space for focused tasks, virtual meetings, or brainstorming sessions office pods can be easily installed, moved, or reconfigured to adapt to changing office needs, making them a flexible solution for workspace design.

Increased Productivity: With fewer interruptions and a dedicated workspace, employees can accomplish tasks more efficiently and with better focus.

Collaboration and Teamwork: Office pods create an environment where effective communication and teamwork are encouraged, striking a balance between maintaining privacy and preserving a sense of openness through the use of glass panels.

Aesthetic Appeal: They have a stylish and contemporary design that enhance the visual appeal of a workplace, contributing to a positive work atmosphere and a professional impression.

Cost-Efficiency: They provide a cost-effective solution in contrast to traditional office renovations, eliminating the need for permanent walls and extensive construction.

Energy Efficiency: Many office pods come equipped with energy-efficient lighting and ventilation systems, resulting in reduced energy consumption and environmental benefits.

Health and Well-being: By supplying employees with private and comfortable spaces, office pods play a role in enhancing mental well-being and overall job satisfaction.

Office pods offer a versatile solution that addresses the need for privacy, focus, flexibility, and well-being in today's dynamic and collaborative workplaces.

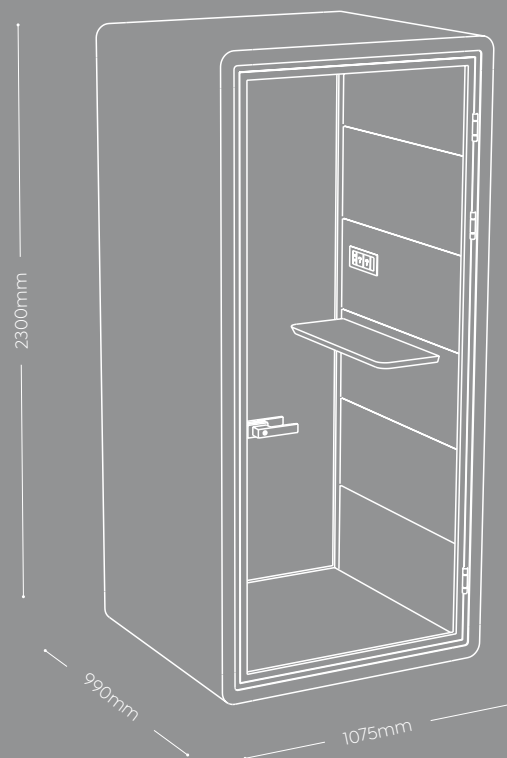

Haven Solo

A compact and versatile space designed for the individual with privacy and focus in mind. The Haven Solo eliminates the need for staff to find a quiet room or leave the building. Solo gives them the privacy they need away from distractions while minimizing disruption to the rest of the office. Featuring a built-in laptop table this acoustic pod is perfect for individual work and phone calls.

Haven Solo+

A quiet space is important in order to focus and create. Solo+ offers all the features of Solo, with an added touch of style through its upholstered sectional padded walls. Whether you need a discreet spot for a confidential phone call or prefer not to disturb the entire office, Solo+ provides an ideal breakout space, ensuring your conversations remain private.

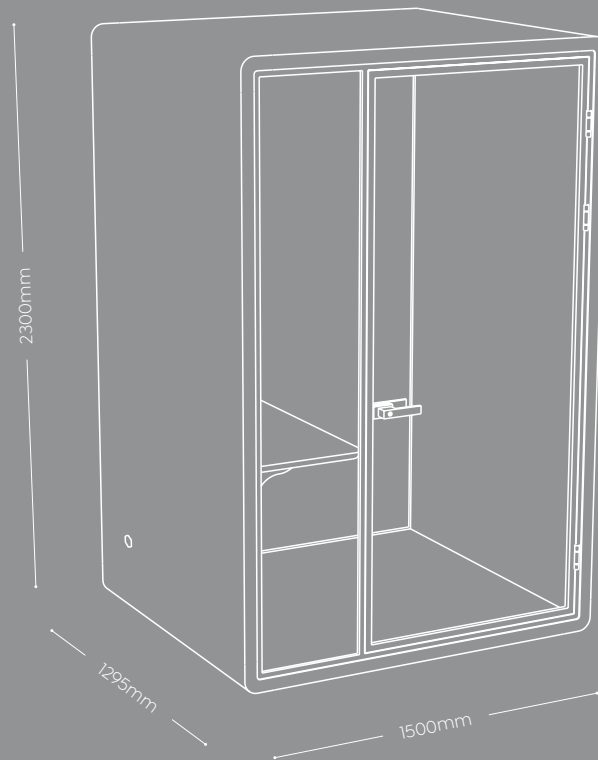

Model	Solo+
External Dimensions (mm)	1075W x 990D x 2300H
Internal Dimensions (mm)	945W x 897D x 2170H
Floor Space (m ²)	1.06
Net Weight (kg)	300
Sound Reduction (RW+Ctr)	30dB (±5dB)
Reverberation Time (RT)	0.25 (±0.1s)
Ventilation (m ³ /h)	153
Capacity	1 Person
Table Height (mm)	1050
Application	Phone Calls Short Tasks Virtual Meeting

Haven Focus

Need a little more space, where you can sit and work for a longer period without the distraction? Haven Focus is your go-to space for focused work. Step inside, block out the noise, and enjoy an enhanced level of concentration that boosts your productivity. Whether you're working remotely or just need a quiet spot, this individual compact unit with a desk is your destination for distraction-free work.

Model	Focus
External Dimensions (mm)	1500W x 1295D x 2300H
Internal Dimensions (mm)	1445W x 1208D x 2170H
Floor Space (m ²)	2.04
Net Weight (kg)	480
Sound Reduction (RW+Ctr)	30dB (±5dB)
Reverberation Time (RT)	0.25 (±0.1s)
Ventilation (m ³ /h)	306
Capacity	1 Person
Table Height (mm)	780
Application	Focused Tasks Temporary Office Study Space Confidential Work

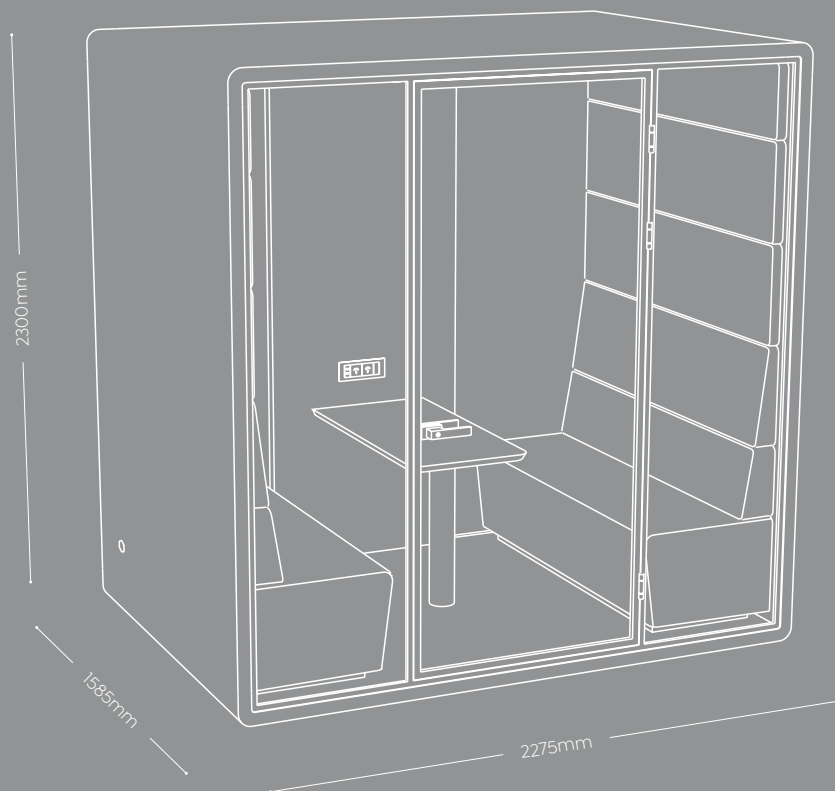

Haven Team

Finding a private meeting area within a conventional office layout can often pose challenges. Haven Team provides a solution by offering a quiet, dedicated space where teams can collaborate without the disruptions of the surrounding office. It's a place where ideas can flow freely, small meetings can be conducted in peace, and teamwork can flourish without the interference of background noise.

Haven Team+

Discover a blend of style and practicality within the Haven Team+ office pod. Featuring a modern and sleek design, it offers an ideal setting for hosting essential conference calls and delivering impactful presentations. In our rapidly evolving, digital work environment, the necessity for a dedicated space to facilitate effective communication has never been more vital.

Model	Team+

Internal Dimensions (mm)	2145W x 1498D x 2170H
Floor Space (m ²)	3.6
Net Weight (kg)	730
Sound Reduction (RW+Ctr)	30dB (±5dB)
Reverberation Time (RT)	0.25 (±0.1s)
Ventilation (m ³ /h)	459
Capacity	4-6 People
Table Height (mm)	735
Application	Team Meetings Brainstorming Sessions Project Collaboration Interviews Collaborative Work Market Research Video Conferencing

Haven Studio

Making structural alterations can often be expensive and time consuming, Haven Studio is a perfect room-in-room solution for establishing a quiet space in an active open office environment. Its generous size allows for versatile utilisation, whether you require a brief team huddle, a creative brainstorming session, or a professional client presentation space.

Features

Glass

Dual-pane laminated tempered acoustic sound control glass with a 5mm+5mm thickness. Optional switch glass for added privacy (indent only).

Body

45mm thickness - multi-layer sound insulation material encased between galvanised steel plates.

Interior Surface

12mm environmental-friendly flame-retardant sound absorbing recycled PET panel.

Carpet

Environmentally friendly nylon carpet that is wear-resistant, flame-retardant, waterproof, anti-slip & anti-fouling.

Motion Sensor

Smart sensor activates lighting and fans, helping you stay energy efficient. Power consumption when in use 29W.

LED Lighting

Overhead built-in LED 4000K smart sensor lighting. Complies with CE Certificate.

Fan

Safe, low voltage, ultra quiet, 300mm large air volume fan. Fan speed: 750rpm, Air Volume: 90CFM. Complies to cUL CCC ROHS certificate. Adjustable via dial in pod.

Ventilation

Smart sensor-based ventilation system. During occupancy, the air is refreshed every 3 minutes, and when unoccupied, the system runs for 15 minutes every half an hour to uphold the level of freshness.

Sound Insulation

Engineered to reduce noise by 30dB. SGS environmental certification.

Power Outlets

Each pod is equipped with a USB Type B and C ports for charging your phone, along with two 10A 250V AC power outlets for plugging in your laptop.

Power Supply

Standard 250V three-pin plug that plugs straight into a wall socket (no hardwiring required) with 1.8m length power cord.

Feet/Castors

Designed with concealed casters for easy relocation and moveability, along with leveling feet to accommodate uneven surfaces.

Built-in Table

E1 Grade density board with a 30mm thickness and beveled edges, laminated in white.

Installation

Modular installation - No glue or nailing involved during the installation. Installation must be carried out by our accredited pod installers.

Warranty

For added peace of mind Haven Pods come with a five-year warranty for structural defects and a one-year warranty for electrical components. View warranty details and restrictions here officepods.co.nz/warranty

Materials

Pods are designed with sound absorbency in mind to create a quieter and more focused work environment. With specialised acoustic materials and engineering, pods help reduce noise pollution, making it easier to concentrate on tasks or have confidential conversations without disruptions from the surrounding office space.

Haven Pods are constructed with a 57mm thick wall made up of layers – sound absorbing recycled PET panel, high-density sound absorbing cotton and powder-coated steel sheets – for maximum sound insulation.

Switch Glass

Do you require visual privacy?

Switch glass is the ingenious solution that transforms ordinary office pods into dynamic and adaptable spaces. With a simple flick of a switch, smart glass technology changes from transparent to opaque, offering instant privacy and flexibility as needed.

Switch glass is available by indent only. For more details and lead times, contact info@officepods.co.nz
